

****Equity Income Fund Profile****

****Introduction****

The Equity Income Fund is a unit trust fund managed by James Williams, a seasoned investment professional with a proven track record of delivering consistent returns. The fund was launched on May 22, 2003, with the objective of providing investors with a regular income stream and long-term capital growth. In this profile, we will provide an in-depth overview of the fund's characteristics, investment strategy, and performance.

****Fund Overview****

The Equity Income Fund is a GBP-denominated unit trust fund that invests primarily in a diversified portfolio of UK and international equities. The fund's total assets currently stand at approximately £91,793,398.72, making it a significant player in the equity income sector. The fund's risk rating is 2, indicating a moderate level of risk, which is suitable for investors seeking a balance between income and capital growth.

****Investment Objective****

The primary investment objective of the Equity Income Fund is to generate a regular income stream and achieve long-term capital growth by investing in a diversified portfolio of equities. The fund manager, James Williams, seeks to achieve this objective by identifying and investing in high-quality companies with a strong track record of paying consistent dividends.

****Investment Strategy****

The fund's investment strategy is centered around a bottom-up stock-picking approach, where the fund manager conducts thorough research and analysis to identify companies with strong financials, competitive advantages, and a proven track record of paying consistent dividends. The fund's portfolio is diversified across various sectors and geographies, with a focus on UK and international equities.

****Portfolio Composition****

The Equity Income Fund's portfolio is comprised of a mix of large-cap, mid-cap, and small-cap stocks, with a focus on companies that have a history of paying consistent dividends. The fund's sector allocation is diversified, with a focus on sectors such as financials, consumer goods, and industrials. The fund's geographic allocation is also diversified, with a focus on the UK, Europe, and North America.

****Fund Performance****

The Equity Income Fund has a strong track record of delivering consistent returns, with a net asset value (NAV) of 101.2 as of the latest available data. The fund's performance is benchmarked against the FTSE All-Share Index, and it has consistently outperformed its benchmark over the long term. The fund's expense ratio is 1.01%, which is competitive with other equity income funds in the market.

****Risk Management****

The Equity Income Fund's risk management strategy is centered around diversification, with a focus

on spreading risk across various sectors, geographies, and asset classes. The fund manager also employs a range of risk management techniques, including stop-loss orders and position sizing, to manage downside risk.

****Investment Process****

The fund's investment process is rigorous and disciplined, with a focus on fundamental research and analysis. The fund manager conducts regular meetings with company management, industry experts, and other stakeholders to gain insights into the companies in which the fund invests. The fund manager also employs a range of quantitative models and tools to analyze financial data and identify trends.

****Manager's Commentary****

"We are pleased with the fund's performance over the long term, which is a testament to our disciplined investment approach and commitment to delivering consistent returns for our investors," said James Williams, fund manager of the Equity Income Fund. "We remain focused on identifying high-quality companies with strong financials and a proven track record of paying consistent dividends, and we are confident that our investment strategy will continue to deliver strong returns for our investors over the long term."
